Asset Allocation | Factsheet as of 30 September 2025

Investment Overview

The Protected Cell is dedicated to investing in one or more share classes (each, an "Underlying Share Class") of Franklin Templeton Investment Funds –Franklin Income Fund (the "Underlying Master Fund"). The investment objective of the Underlying Master Fund is to maximise income while maintaining prospects for capital appreciation. The Underlying Master Fund pursues an actively managed investment strategy and invests mainly in equity and equity-related securities (including equity-linked notes) issued by companies located in, or doing significant business in, the U.S., and in debt securities of any quality (including lower quality) issued by corporations and governments.

Past performance does not predict future returns.

What are the Risks?

Potential investors should be aware that an investment in the Protected Cell involves a high degree of risk and is suitable only for investors who fully understand and who can bear the risks of such an investment for an indefinite period. Listed below are the 'Certain Risk Factors' relating to an investment in the Protected Cell: **Credit risk:** the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities. **Foreign Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations. All potential investors must carefully read the sections entitled "Certain Risk Factors and Potential Conflicts of Interest" in the Prospectus and Supplement for a full discussion of all the risks before making an investment in the Protected Cell.

Glossary

Ongoing Charges Figure (OCF): The Ongoing Charges Figure (OCF) includes the fees paid to the management company, the investment manager and the depository, as well as certain other expenses. The OCF is calculated by taking the relevant main material costs paid out over the 12-month period indicated and dividing them by the average net assets over the same period. The OCF does not include all expenses paid by the fund (for example, it does not include what the fund pays for buying and selling securities). For a comprehensive list of the types of costs deducted from fund assets, see the prospectus. **Distribution Yield:** The Distribution Yield reflects the amounts that may be expected to be distributed over the next 12 months as a percentage of the Net Asset Value of the class as at the reported date. It is based on a snapshot of the portfolio on that day. It does not include any subscription charges and investors may be subject to tax on distributions. **Comparator:** Benchmark is used for comparing Fund performance, but is not a constraint to Fund Investment.
